Finding the Right Technology Is Key

Factors to Consider When Evaluating Technologies & Vendors

Summary

Objectives

- Identify whether challenges are process-driven, people-driven, or technology-driven.
- Recognize areas where process improvements might be needed before a technological change.
- Discuss planning strategies for a change in technology.
- Describe how to go about selecting a new technology platform or vendor.

Hardest Part? – Where to Start?

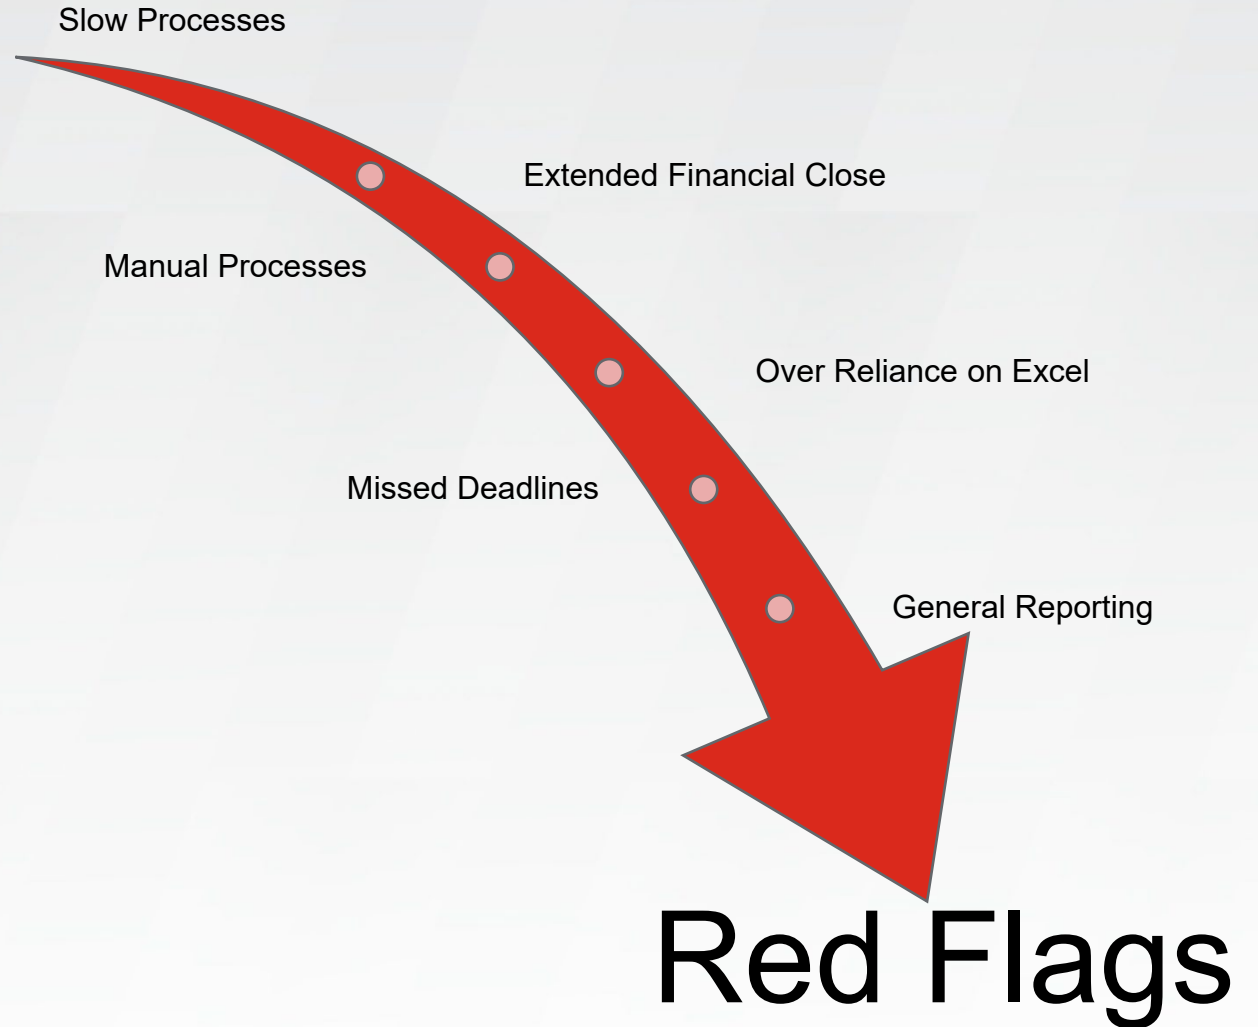

Digital Transformation – Where to Start?

- Digital transformation can be scary
 - They challenge the idea of “this is how we’ve always done it”
- Figuring out the Why, How, Who, & When can be even worse
 - Considering all the factors that need to change is intimidating
- The best systems, processes, & intentions can fall flat if not planned properly
 - A holistic view must drive the change

Organizational Review

Based on a survey of 80 nonprofits, only 11% view their organization's approaches to digital as highly effective.*

FORV/S

The Nonprofit Difference

Over 75% of organizations believe digital transformation is very important to enhance processes, improve reporting, & protect their data.*

While it is evident Digital Transformation is important to nonprofits, the path to digital transformation is not easy or linear, for reasons including:

- **Legacy Processes:** Personnel at nonprofits are big at finding ways to get the job done to fulfill their mission, & for the majority of organizations, these legacy ways work
- **Unique Culture:** Changing the way business is done without losing the secret sauce that makes the nonprofit successful
- **Fostering Mission-Driven People:** Working with institutional knowledge & not losing it

Areas Where Digital Transformation Can Assist

Financial Reporting & Monitoring

Budgeting & Financial Planning

Grants Management

Asset Management

Cash Receipts

Human Resources

Restricted Funding/Loan Reporting

Accounts Payable

Procurement

Donor Management

Payroll

Project Management

The WHY – Process Review

Changes required by companies routinely fall into one of three buckets

Processes

Outdated
Technology

People

Figuring Out the How

Changes Pre-Implementation

The How – Potential Changes

Once the areas for change are identified, then what?

Process

- Eliminating manual processes
- Identifying necessary data & cutting out unnecessary steps
- Reviewing of necessary external & internal reporting

People

- Allocating personnel for “highest & best use”
- Upskilling current personnel for more advanced tasks

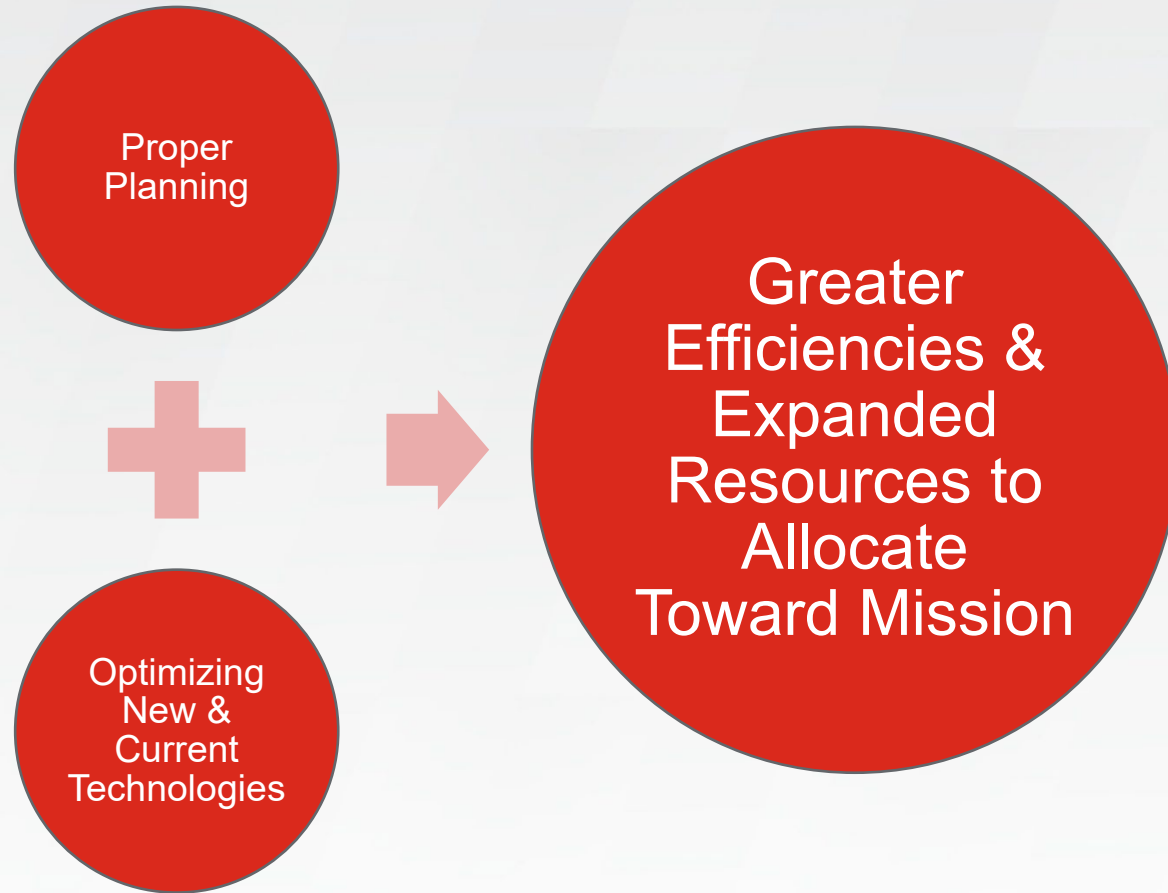

Systems

- Identifying the intersection of changes & technology
- Created an integrated systems environment

Challenges to Beginning Your Digital Transformation Process ...

Plan Plan Plan

Questions to Ask Internally

How will the technology

- Improve our organization?
 - Either by decreasing costs or increasing revenue (funding)
- Improve our customer/client/donor experience?
- Improve our employee experience?

FORV/S

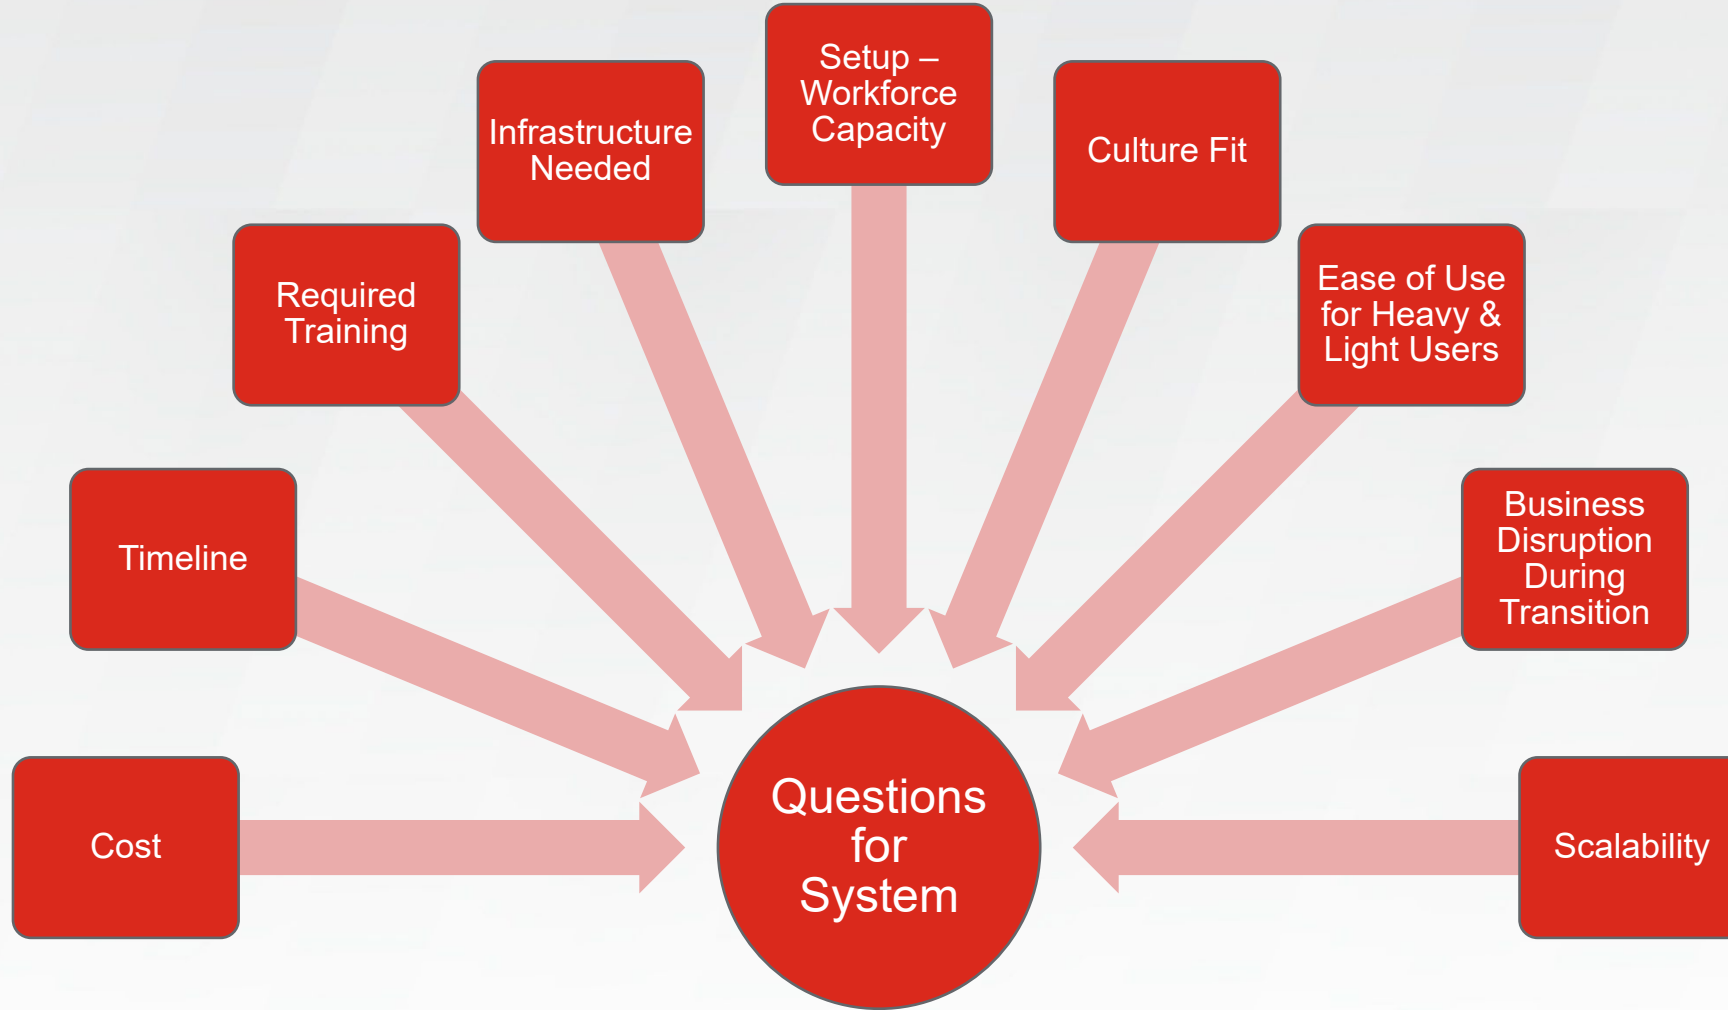

Determine Resources for a Digital Transformation

Day-to-day work doesn't stop with a new project

Developing realistic time frames & job duties is key in the planning phase

Will the organization need external resources to ensure that both the organizational & implementation calendar are adhered to?

Finding the Right Technology Is Key

FORV/S

Objectives

- Identify whether challenges are process-driven, people-driven, or technology-driven.
- Recognize areas where process improvements might be needed before a technological change.
- Discuss planning strategies for a change in technology.
- Describe how to go about selecting a new technology platform or vendor.
